

Safety Drum Brake for Critical Loads

Product Design:

- Compact – Good Solution for Space Constraints
- Independent from Hoist Drive Train
- Components may be Manufactured from Stainless Steel for Added Corrosion Protection
- Controlled Adjustable Brake Torque
- Enhanced Safety Features

Fail-Safe Operating Features:

- Activation through Counterweighted Engagement Pawl in the Event of Linkage and/or Actuator Failure
- Approach Angle between Engagement Pawl and Disc Interface Designed to Ensure Positive Engagement
- Proximity Switch Sensor Detects Positive Engagement
