Standards & Licensing:

Our cranes are manufactured to CMAA Specifications 70 or 74. We can also supply cranes that meet ASME NOG-1 requirements.

American Crane has numerous Professional Engineers licensed in multiple states. Numerous employees also hold state-specific licensing/authorization with various state's Board's of Registration.

American Crane & Equipment Corporation (ACECO) is a privately held international material handling company located in Southeastern Pennsylvania, USA with two offices approximately 40 minutes from Philadelphia and one plant 5 minutes from the Philadelphia International Airport.

American Crane is recognized as a leader in the design and manufacture of electric overhead traveling cranes, wire rope hoists and custom engineered lifting equipment, offering equipment for a wide variety of applications up to 1000 ton capacity.

The company has extensive experience as a supplier of industrial cranes and offers a full range of cranes and hoists for most applications.

American Crane is a full service company with the capability to provide its services on a turnkey basis. Its staff includes an engineering department with capabilities in all major engineering disciplines.

The backbone of the company is a large and well equipped manufacturing facility. American Crane's products are supported by a highly skilled field service department capable of providing installation, startup and ongoing maintenance service. Our Service Department serves the local Philadelphia and Southeastern PA regions as well as the entire country with special projects overseas.

American Crane is recognized as one of the few crane manufacturers with a Quality Control Program that has been audited and accepted in accordance with stringent quality regulatory requirements necessary for the manufacture of cranes handling nuclear material.

American Crane has also been successfully audited by many engineering firms, the Department of Energy, and the aerospace industry. The success of the company testifies to its goal to maintain a highly skilled workforce with a commitment to provide the highest quality products at a competitive cost.

American Crane & Equipment Corporation has many customers in a variety of industries ranging from energy to aerospace. The company regularly provides services and products for the U.S. military and other government operations.
