For Safe & Efficient Dry Spent Fuel Storage

LEADER IN UPGRADING CRANES

Single Failure Proof Cranes and Replacement Trolleys meet NUREG and ASME NOG-1 Requirements.

Successful Crane Upgrades Include:

- Maine Yankee
- Oyster Creek
- Palo Verde Units 1, 2 and 3
- St. Lucie Units 1 and 2
- Millstone Units 2 and 3
- Seabrook
- Kewaunee
- Turkey Point 3 and 4
- Salem 1 and 2
- La Crosse
Benefits of Crane Upgrades for Dry Spent Fuel Storage:

- Enhanced Safety
- Process Efficiency
- Position and Boundary Controls
- Increased Reliability for Plant Life Extension

Specialized American Crane Products and Services for Dry Spent Fuel Projects:

- SAFLIFT®
- Cask Lifting Devices
- 200 Ton Load Test Facility
- Large In-House Engineering Staff
- 10 CFR 50 Appendix B / ASME NQA-1
- Nuclear Quality Assurance Program
- Site Installation and Testing Experience
- Licensing Support

American Crane meets all Key Standards for Crane Upgrades including NUREG 0554, NUREG 0612 / APP. C and ASME NOG-1.
